

## *Staying in the Circle of Life*

### **Continuing Leadership for Social Support: Overview**

This session will be an open discussion facilitated by the participants. The goal of the session is for the participants to discuss the experience of the support group, anything learned that was helpful and that they hope to continue after the intervention. Participants will then discuss the pros and cons of their continuing the group after our intervention is complete.

Participants can discuss different ideas for how the independent group can take form and which areas of support are of greatest priority. We are able to arrange the use of meeting space at a number of locations throughout the area for their convenience if they decide they would like to continue meeting.

Participants will be given the Leadership guide in an effort to alleviate some of the potential concerns about group leadership.

The role of the *promotores* is to facilitate discussion about the above listed topics and provide ideas for how they may achieve their goals, barriers they may face, or resources that may be available.
